Design guidelines

- Use only high-quality images of at least 300 dpi or more. You can also overlay them in a vector file, if this is unclear please contact Design team.
- Provide texts in outline or send the font along.

We emphasize that a general tolerance applies for misplacement up to +/- 5 mm in any direction. Also – when printing multiple colors – a tolerance of +/- 2 mm per color must be taken into consideration. Colors on monitors and color printers can differ from final print and color differences and/or spots cannot be prevented. Small parts, grids and text can be closed or broken. Please check this proof carefully for spelling errors, color deviations, etc. After your approval we cannot be held accountable for spelling errors.

We can use samples, pictures and drawings of this project for marketing purposes. This print-proof is subject to the general terms and conditions of The Branding Club.
